SAP Project Internship Program

A 45-day hands-on project experience for SAP learners ready to move from training to practical implementation exposure.

About the Program

This is not a paid internship or employment opportunity. It is a structured, simulated SAP implementation project designed to give practical, project-style exposure in a controlled learning environment.

As part of the program, participants will:

- Form cross-module project teams with other SAP professionals and learners
- Work on a simulated, end-to-end SAP implementation project
- Handle real-world business scenarios and implementation requirements
- Collaborate across different SAP functional and technical modules
- Gain hands-on experience with project activities, processes, and deliverables
- Experience how SAP professionals collaborate as an implementation team

Program at a Glance

Duration	45 Days
Eligibility	Completed SAP training in one or more of: SD, MM, FICO, PP, or ABAP
